

Additional information

Risk factors

A number of factors (risk factors) affect Prudential's operating results, financial condition and trading price. The risk factors mentioned below should not be regarded as a complete and comprehensive statement of all potential risks and uncertainties. The information given is as of the date of this report, is not updated, and any forward-looking statements are made subject to the reservations specified below under 'Forward-Looking Statements'.

Prudential's businesses are inherently subject to market fluctuations and general economic conditions.

Prudential's businesses are inherently subject to market fluctuations and general economic conditions. In the UK, this is because a significant part of Prudential's shareholders' profit is related to bonuses for policyholders declared on its with-profits products, which are broadly based on historic and current rates of return on equity, real estate and fixed income securities, as well as Prudential's expectations of future investment returns.

In the US, fluctuations in interest rates can affect results from Jackson National Life Insurance Company (Jackson), which has a significant spread-based business and where the majority of investments are in fixed-income securities. The spread is the difference between the rate of return Jackson is able to earn on the assets backing the policyholders' liabilities and the amounts that are credited to policyholders in the form of benefit increases, subject to minimum crediting rates. Jackson also writes a significant amount of variable annuities that offer capital or income protection guarantees. Any cost of the guarantees that remain unhedged will affect the Company's results.

For some non unit-linked products, in particular those written in some of the Group's Asian operations, it may not be possible to hold assets which will provide cash flows to exactly match those relating to policyholder liabilities. This is particularly true in those countries where bond markets are not developed and in certain markets such as Taiwan where regulated surrender values are set by regulators with reference to the interest rate environment prevailing at time of policy issue. This results in a mismatch due to the duration and uncertainty of the liability cash flows and the lack of sufficient assets of a suitable duration. This residual asset/liability mismatch risk can be managed but not eliminated. Where interest rates in these markets remain lower than interest rates used to calculate surrender values over a sustained period this could have an adverse impact on the Group's reported profit.

In all markets in which Prudential operates, its businesses are susceptible to general economic conditions and changes in investment returns, which can also change the level of demand for Prudential's products. Past uncertain trends in international economic and investment climates which have adversely affected Prudential's business and profitability could be repeated. This adverse effect would be felt principally through reduced investment returns and higher credit defaults. In addition, falling investment returns could impair its ability to write significant volumes of new business. Prudential, in the normal course of business, enters into a variety of transactions, including derivative transactions with counterparties. Failure

of any of these counterparties, particularly in conditions of major market disruption, to discharge their obligations, or where adequate collateral is not in place, could have an adverse impact on Prudential's results.

Prudential is subject to the risk of exchange rate fluctuations owing to the geographical diversity of its businesses.

Due to the geographical diversity of Prudential's businesses, it is subject to the risk of exchange rate fluctuations. Prudential's international operations in the US and Asia, which represent a significant proportion of operating profit and shareholders' funds, generally write policies and invest in assets denominated in local currency. Although this practice limits the effect of exchange rate fluctuations on local operating results, it can lead to significant fluctuations in Prudential's consolidated financial statements upon translation of results into pounds sterling. The currency exposure relating to the translation of reported earnings is not separately managed. Consequently, this could impact on the Group's gearing ratios (defined as debt over debt plus shareholders' funds). The impact of gains or losses on currency translations is recorded as a component within the statement of changes in equity.

Prudential conducts its businesses subject to regulation and associated regulatory risks, including the effects of changes in the laws, regulations, policies and interpretations and any accounting standards in the markets in which it operates.

Changes in government policy, legislation or regulatory interpretation applying to companies in the financial services and insurance industries in any of the markets in which Prudential operates, which in some circumstances may be applied retrospectively, may adversely affect Prudential's product range, distribution channels, capital requirements and, consequently, reported results and financing requirements. For instance, regulators in jurisdictions in which Prudential operates may change the level of capital required to be held by individual businesses. Also these changes could include possible changes in the regulatory framework for pension arrangements and policies, the regulation of selling practices and solvency requirements. In the UK several proposed and potential regulatory changes could have significant effect on the types of products Prudential provides to its customers and intermediaries and how those products are priced, distributed and sold. These include the Financial Services Authority's (FSA's) Treating Customers Fairly initiative, the FSA's review of retail distribution, the proposed regulatory change affecting the pensions market and the implementation of the new European Union (EU) solvency framework for insurers (Solvency II) which should be implemented by member states during 2012.

The current EU Insurance Groups Directive (IGD) requires European financial services groups to demonstrate net aggregate surplus capital in excess of solvency requirements at the Group level in respect of shareholder-owned entities. The test is a continuous requirement, so that Prudential needs to maintain a somewhat higher amount of regulatory capital

at the Group level than otherwise necessary in respect of some of its individual businesses to accommodate, for example, short-term movements in global foreign exchange rates, interest rates, deterioration in credit quality and equity markets. In addition, changes in the local regulatory environment of countries where this is deemed equivalent to the EU could affect the calculation of the Group's solvency position. The application of Solvency II requirements to international groups is still unclear and there is a risk of inconsistent application in different member states which may place Prudential at a competitive disadvantage to other European and non-European financial services groups.

Various jurisdictions in which Prudential operates have created investor compensation schemes that require mandatory contributions from market participants in some instances in the event of a failure of a market participant. As a major participant in the majority of its chosen markets, circumstances could arise where Prudential, along with other companies, may be required to make additional material contributions.

The Group's accounts are prepared in accordance with current international financial reporting standards (IFRS) applicable to the insurance industry. The International Accounting Standards Board (IASB) introduced a framework that it described as Phase I that permitted insurers to continue to use the statutory basis of accounting that existed in their jurisdictions prior to January 2005. The IASB has published proposals in its Phase II discussion paper that would introduce significant changes to the statutory reporting of insurance entities that prepare accounts according to IFRS. It is uncertain in what form the proposals in the discussion paper will be taken forward into a definitive IFRS and when such changes might take effect.

European Embedded Value (EEV) basis results are published as supplementary information. The EEV basis is a value based reporting method for Prudential's long-term business which is used by market analysts and which underpins a significant part of the key performance indicators used by the Company's management for both internal and external reporting purposes. The Chief Financial Officers' (CFO) Forum will be publishing principles and guidance for calculating EEV results on a market-consistent basis. Prudential intends to adopt the market-consistent approach in 2008. This will result in a restatement of reported EEV results and change the reporting basis of future results.

The resolution of several issues affecting the financial services industry could have a negative impact on Prudential's reported results or on its reputation or on its relations with current and potential customers.

Prudential is, and in the future may be, subject to legal and regulatory actions in the ordinary course of its business, both in the UK and internationally. This could be a review of business sold in the past under previously acceptable market practices at the time such as the requirement in the UK to provide redress to certain past purchasers of pension and mortgage endowment policies, changes to the tax regime affecting products and regulatory reviews on products sold and industry practices, including in the latter case businesses it has closed.

Regulators particularly, but not exclusively, in the US and the UK are moving towards a regime based on principles-based regulation which brings an element of uncertainty. These regulators are increasingly interested in the approach that product providers use to select third-party distributors. In some case product providers can be held responsible for the deficiencies of third-party distributors.

In the US, federal and state regulators have focused on, and continue to devote substantial attention to, the mutual fund, fixed index and variable annuity and insurance product industries. This includes new regulations in respect of the suitability of broker-dealers' sales of certain products. As a result of publicity relating to widespread perceptions of industry abuses, there have been numerous regulatory inquiries and proposals for legislative and regulatory reforms.

In Asia, regulatory regimes are developing at different speeds, driven by a combination of global factors and local considerations. There is a risk that new requirements are retrospectively applied to sales made prior to their introduction.

Litigation and disputes may adversely affect Prudential's profitability and financial condition.

Prudential is, and may be in the future, subject to legal actions and disputes in the ordinary course of its insurance, investment management and other business operations. These legal actions and disputes may relate to aspects of Prudential's businesses and operations that are specific to Prudential, or that are common to companies that operate in Prudential's markets. Legal actions and disputes may arise under contracts, regulations or from a course of conduct taken by Prudential, and may be class actions. Although Prudential believes that it has adequately reserved in all material aspects for the costs of litigation and regulatory matters, no assurance can be provided that such reserves are sufficient. Given the large or indeterminate amounts of damages sometimes sought, and the inherent unpredictability of litigation and disputes, it is possible that an adverse outcome could, from time to time, have an adverse effect on Prudential's results of operation or cash flows.

Prudential's businesses are conducted in highly competitive environments with developing demographic trends and Prudential's continued profitability depends on its management's ability to respond to these pressures and trends.

The markets for financial services in the UK, US and Asia are highly competitive, with several factors affecting Prudential's ability to sell its products and its continued profitability, including price and yields offered, financial strength and ratings, range of product lines and product quality, brand strength and name recognition, investment management performance, historical bonus levels, developing demographic trends and customer appetite for certain savings products. In some of its markets Prudential faces competitors that are larger, have greater financial resources or a greater market share, offer a broader range of products or have higher bonus rates or claims-paying ratios. Further, heightened competition for talented and skilled employees with local experience, particularly in Asia, may limit the Group's potential to grow its business as quickly as planned.

Additional information

Risk factors continued

Within the UK, Prudential's principal competitors in the life insurance market include many of the major retail financial services companies including, in particular, Aviva, Legal & General, HBOS and Standard Life.

Jackson's competitors in the US include major stock and mutual insurance companies, mutual fund organisations, banks and other financial services companies such as AIG, AXA, Hartford, Lincoln National, MetLife and TIAA-CREF.

In Asia, the Group's main regional competitors are international financial companies, including AIG, Allianz, AXA, ING and Manulife. In a number of markets, local companies have a very significant market presence.

Prudential believes competition will intensify across all regions in response to consumer demand, technological advances, the impact of consolidation, regulatory actions and other factors. Prudential's ability to generate an appropriate return depends significantly upon its capacity to anticipate and respond appropriately to these competitive pressures.

Downgrades in Prudential's financial strength and credit ratings could significantly impact its competitive position and hurt its relationships with creditors or trading counterparties.

Prudential's financial strength and credit ratings, which are used by the market to measure its ability to meet policyholder obligations, are an important factor affecting public confidence in most of Prudential's products, and as a result its competitiveness. Changes in methodologies and criteria used by rating agencies could result in downgrades that do not reflect changes in the general economic conditions or Prudential's financial condition. Downgrades in Prudential's ratings could have an adverse effect on its ability to market products and retain current policyholders. In addition, the interest rates Prudential pays on its borrowings are affected by its debt credit ratings, which are in place to measure Prudential's ability to meet its contractual obligations. Prudential believes the credit rating downgrades it experienced in 2002 and 2003, together with the rest of the UK insurance industry, and in 2006 by Standard & Poor's to bring Prudential into line with the standard rating agency notching between operating subsidiary financial strength rating and the credit rating for other European insurance holding companies, have not to date had a discernible impact on the performance of its business.

Prudential's long-term senior debt is rated as A2 (stable outlook) by Moody's, A+ (stable outlook) by Standard & Poor's and AA- (stable outlook) by Fitch.

Prudential's short-term debt is rated as P-1 by Moody's, A-1 by Standard & Poor's and F1+ by Fitch.

Prudential Assurance Company's (PAC's) financial strength is rated Aa1 (negative outlook) by Moody's, AA+ (stable outlook) by Standard & Poor's and AA+ (stable outlook) by Fitch.

Adverse experience in the operational risks inherent in Prudential's business could have a negative impact on its results of operations.

Operational risks are present in all of Prudential's businesses, including the risk of direct or indirect loss resulting from inadequate or failed internal and external processes, systems and human error or from external events. Prudential's business is dependent on processing a large number of complex transactions across numerous and diverse products, and is subject to a number of different legal and regulatory regimes. In addition, Prudential outsources several operations, including in the UK a significant part of its back office and customer-facing functions as well as a number of IT functions. In turn, Prudential is reliant upon the operational processing performance of its outsourcing partners.

Further, because of the long-term nature of much of Prudential's business, accurate records have to be maintained for significant periods. Prudential's systems and processes incorporate controls which are designed to manage and mitigate the operational risks associated with its activities. For example, any weakness in the administration systems or actuarial reserving processes could have an impact on its results of operations during the effective period. Prudential has not experienced or identified any operational risks in its systems or processes during 2007, or which have subsequently caused, or are expected to cause, a significant negative impact on its results of operations.

Adverse experience against the assumptions used in pricing products and reporting business results could significantly affect Prudential's results of operations.

Prudential needs to make assumptions about a number of factors in determining the pricing of its products and for reporting the results of its long-term business operations. For example, the assumption that Prudential makes about future expected levels of mortality is particularly relevant for its UK annuity business. In exchange for a premium equal to the capital value of their accumulated pension fund, pension annuity policyholders receive a guaranteed payment, usually monthly, for as long as they are alive. Prudential conducts rigorous research into longevity risk, using data from its substantial annuitant portfolio. As part of its pension annuity pricing and reserving policy, Prudential UK assumes that current rates of mortality continuously improve over time at levels based on adjusted data from the Continuous Mortality Investigations (CMI) medium cohort table projections (as published by the Institute and Faculty of Actuaries). If mortality improvement rates significantly exceed the improvement assumed, Prudential's results of operations could be adversely affected.

A further example is the assumption that Prudential makes about future expected levels of the rates of early termination of products by its customers (persistence). This is particularly relevant to its lines of business other than its UK annuity business. Prudential's persistence assumptions reflect recent past experience for each relevant line of business. Any expected deterioration in future persistence is also reflected in the assumption. If actual levels of future persistence are

significantly lower than assumed (that is, policy termination rates are significantly higher than assumed), Prudential's results of operations could be adversely affected.

In common with other industry participants, the profitability of the Group's businesses depends on a mix of factors including mortality and morbidity trends, policy surrender rates, investment performance, unit cost of administration and new business acquisition expense.

As a holding company, Prudential is dependent upon its subsidiaries to cover operating expenses and dividend payments.

Prudential's insurance and investment management operations are generally conducted through direct and indirect subsidiaries. As a holding company, Prudential's principal sources of funds are dividends from subsidiaries, shareholder-backed funds, the shareholder transfer from Prudential's long-term funds and any amounts that may be raised through the issuance of equity, debt and commercial paper. Certain of the subsidiaries are regulated and therefore have restrictions that can limit the payment of dividends, which in some circumstances could limit the Group's ability to pay dividends to shareholders.

Prudential operates in a number of markets through joint ventures and other arrangements with third parties. These arrangements involve certain risks that Prudential does not face with respect to its consolidated subsidiaries.

Prudential operates, and in certain markets is required by local regulation to operate, through joint ventures. Prudential's ability to exercise management control over its joint venture operations and its investment in them depends on the terms of the joint venture agreements, in particular, the allocation of control among, and continued co-operation between, the joint venture participants. Prudential may also face financial or other exposure in the event that any of its joint venture partners fails to meet its obligations under the joint venture or encounters financial difficulty. In addition, a significant proportion of the Group's product distribution is carried out through arrangements with third parties not controlled by Prudential and is dependent upon continuation of these relationships. A temporary or permanent disruption to these distribution arrangements could affect Prudential's results of operations.

Shareholder enquiries

Equiniti Limited
 Aspect House
 Spencer Road
 Lancing
 West Sussex BN99 6DA
 Tel: 0871 384 2035
 Fax: 0871 384 2100
 Textel: 0871 384 2255 (for hard of hearing)

Calls to 0871 numbers are charged at eight pence per minute from a BT landline. Other telephony providers costs may vary.

Dividend mandates

Shareholders may find it convenient to have their dividends paid directly to their bank or building society account. If you wish to take advantage of this facility, please call Equiniti and request a 'Dividend Mandate' form. Alternatively, you may download a form from http://www.prudential.co.uk/prudential-plc/investors/shareholder_services/

Evergreen scrip dividend scheme

The Company will be offering an evergreen scrip dividend scheme in respect of the final dividend for the year ending 31 December 2007. The number of new shares each participating shareholder will be entitled to, is calculated by dividing the total cash dividend due at the record date (11 April 2008) by the scrip reference price.

The scrip reference price is calculated as the average of the middle market quotations for the Company's shares as derived from the Daily Official List of the London Stock Exchange for the five business days which commenced on 9 April 2008.

Once signed up to the evergreen scrip, shareholders will automatically receive shares for all future scrip dividends. This election can be cancelled at any time by the shareholder. Further details of the scrip dividend scheme are available on the Company website at http://www.prudential.co.uk/prudential-plc/investors/shareholder_services/

Electronic communications

Shareholders are encouraged to elect to receive shareholder documents electronically by registering with Shareview at <http://www.shareview.co.uk>. This will save on printing and distribution costs, creating environmental benefits. When you register, you will be sent an email notification to say when shareholder documents are available on our website and you will be provided with a link to that information. When registering, you will need your shareholder reference number which can be found on your share certificate or proxy form. Please contact Equiniti if you require any assistance or further information.

Share dealing services

The Company's Registrars, Equiniti, offer a postal dealing facility for buying and selling Prudential plc ordinary shares, telephone 0871 384 2248. They also offer a telephone and internet dealing service, Shareview, which provides a simple and convenient way of selling Prudential plc shares. For telephone sales call 0871 384 2020 between 8.30am and 4.30pm, Monday to Friday, and for internet sales log on to <http://www.shareview.co.uk/dealing>.

ShareGift

Shareholders who only have a small number of shares whose value makes it uneconomic to sell them may wish to consider donating them to ShareGift (Registered Charity 1052686). The relevant share transfer form is available on our website at http://www.prudential.co.uk/prudential-plc/investors/shareholder_services/forms/ or may be obtained from Equiniti. Further information about ShareGift may be obtained on 020 7337 0501 or from <http://www.ShareGift.org>. There are no implications for capital gains tax purposes (no gain or loss) on gifts of shares to charity and it is also possible to obtain income tax relief.

Irish branch register

The Company operates a branch register for Irish shareholders. All enquiries regarding Irish branch register accounts should be directed to Capita Corporate Registrars Plc, Unit 5, Manor Street Business Park, Manor Street, Dublin 7. Telephone: 00 353 1 810 2400.

American Depositary Receipts (ADRs)

The Company's ordinary shares are listed on the New York Stock Exchange in the form of American Depositary Shares, evidenced by ADRs and traded under the symbol PUK. Each American Depositary Share represents two ordinary shares. All enquiries regarding ADR holder accounts should be directed to JP Morgan, the authorised depositary bank, at JP Morgan Service Center, P O Box 3408, South Hackensack, NJ 07606-3408, USA. Telephone 001 201 680 6630 or log on to <http://www.adr.com>.

Form 20-F

The Company is subject to the reporting requirements of the Securities and Exchange Commission (SEC) in the USA as such requirements apply to foreign companies and files its Form 20-F with the SEC. Copies of Form 20-F can be found on the Company's website at <http://www.prudential.co.uk/prudential-plc/investors/financialreports/> or on the SEC's website at <http://www.sec.gov>.
